Imagistic provides dynamic business technology solutions to businesses, including technology strategy, custom software, website development and other creative services. With a talented staff holding decades of in-depth experience and a client-focused approach, Imagistic works with clients to identify problems and build effective, customized technology solutions.

## Imagistic's Challenge

In order to continue strategically growing their business and keep up in a competitive space, Imagistic needed to reach a larger international target audience, rather than solely focusing on those who speak English.

With project deadlines and budget restrictions in place, they found that Language Department's localization and language services were the most efficient, accurate and timely.

## Language Department's Solution

With a team of global language experts, Language Department is able to provide high quality web development and localization services, translations and accompanying project management for Imagistic's client needs.

Language Department's attention to detail, fast turnaround and overall integrity of work has allowed Imagistic to expand into new markets, and serve a wider range of clients, in the most effective and worry-free way possible.

"When implementing a solution for my clients, having Language Department as a resource means there's one less issue to worry about. The quality, efficiency and integrity with which the work is completed is exceptional."

- Kevin Goldberg, President
